International Joint Meeting

RSME-AMS

2027

RSME and AMS: Two Leading Mathematical Societies

The **Royal Spanish Mathematical Society (RSME)** and the **American Mathematical Society (AMS)** are two of the most prestigious and well-established scientific institutions in the international mathematical community. Founded in **1911** and **1888**, respectively, both societies have been advancing mathematics for more than a century by promoting research, education, scientific outreach, and cooperation among researchers worldwide.

With nearly **2,000 members**, the RSME promotes a wide range of activities in the field of mathematics and plays a key role in representing the Spanish mathematical community before national and international institutions. It actively contributes to strengthening the position and visibility of mathematics in society. The AMS, meanwhile, is one of the world's largest mathematical societies, with approximately **30,000 members in around 125 countries**. Its extensive international activities include conferences, scientific programs, world-renowned publications, and initiatives supporting the professional development of the mathematical community.

Although the RSME regularly organizes major events, such as its Biennial Conference and Its Young Researchers' Conference, the **RSME-AMS Joint International Meeting** holds a unique place among its activities. The collaboration with the AMS gives the event an exceptional international dimension, encouraging the participation of researchers from universities and research centers worldwide and strengthening scientific ties between Spain and North America. This partnership between two long-established societies makes the meeting a leading forum for promoting scientific excellence, fostering new knowledge-transfer initiatives, and creating opportunities for international and inter-institutional collaboration.

RSME-AMS 2027 International Joint Meeting in Santiago de Compostela

From **June 22 to 25, 2027**, Santiago de Compostela will host the **RSME-AMS Joint International Meeting**, one of the most significant international mathematics events to be held in Spain in the coming years. Jointly organized by the RSME and the AMS, the meeting will bring together internationally renowned researchers, promising early-career mathematicians, and representatives from universities and research institutions across numerous countries. The scientific program will feature plenary lectures delivered by world-leading mathematicians, including two Fields Medal recipients. It will also include special sessions covering a broad range of research areas, as well as numerous opportunities designed to foster new scientific collaborations.

The meeting continues an initiative that began with the first RSME-AMS Joint International Meeting held in Seville. More than two decades later, it will once again bring together the European, particularly the Spanish one, and North American mathematical communities to address the scientific and technological challenges of our time. During the event, Santiago de Compostela will become a gathering place for some of the world's most distinguished researchers, further strengthening its position as a host city for major scientific events with global reach.

Sponsorship and collaboration

The **RSME-AMS 2027 Meeting** offers a unique opportunity for **brand visibility and strategic positioning**, providing access to a **highly qualified audience** of researchers, university faculty, doctoral students, and professionals affiliated with internationally renowned academic institutions. The **global reach** of the organizing societies, the **international profile** of the participants, and the **scientific prestige** of the program make RSME-AMS 2027 an exceptional platform for organizations seeking to demonstrate and strengthen their commitment to research, innovation, and excellence.

Sponsorship contributions will be allocated entirely to the organization and delivery of the meeting in Santiago de Compostela, helping to create a high-quality event with significant national and international impact.

By partnering with the meeting, sponsoring organizations will have the opportunity to:

- ◆ Showcase their brand to leading experts, early-career researchers, and industry professionals.
- ◆ Build strategic connections with representatives from universities, research institutions, technology companies, and government agencies.
- ◆ Strengthen their reputation as organizations committed to science and innovation.

Three sponsorship levels are available, offering different degrees of visibility and benefits to meet the specific needs of each organization. Customized partnership proposals that help strengthen connections between the business sector and the scientific community will also be considered.

Bronze – 500 €

- ◆ Inclusion of the sponsor's **logo** on the **conference website** and in the **book of abstracts**.
- ◆ Opportunity to include **promotional materials** in attendees' welcome kits.
- ◆ Authorization to use the **conference logo** in the sponsor's promotional materials until the conclusion of the event.

Silver – 1500 €

- ◆ All benefits included in the **Bronze Package**.
- ◆ Inclusion of the sponsor's **logo** on the conference's main **display banner**.
- ◆ Promotion of the partnership through the conference's official **social media channels** and logo placement on the conference **photo backdrop**.

Gold – 3000€

- ◆ All benefits included in the **Silver Package**.
- ◆ Display of the sponsor's own **promotional banner** in the coffee-break areas.
- ◆ Display of the sponsor's **advertising materials** on screens in the conference rooms between sessions.
- ◆ Dedicated space for a **promotional booth** throughout the conference.
- ◆ **Two complimentary conference registrations**.

Further information

For more information about sponsorship opportunities or other ways to partner with the RSME-AMS 2027 Meeting, please contact us at congreso.rsmeams2027@usc.gal or visit our website:

<https://citmaga.usc.es/rsmeams2027/>

We would be delighted to have your support and partnership in making this landmark event in the mathematical sciences a success.
